## EXPERIENCE

---

### Mind You

May 2026 - Present

*Software Engineering Intern*

- Built an internal developer intelligence dashboard (Next.js 15, TypeScript, Tailwind, shadcn/ui) aggregating engineering news from Hacker News, RSS, GitHub Trending, and Repo Radar into a single feed.
- Automated data collection with GitHub Actions cron workflows, replacing manual feed checks and keeping content continuously current.
- Migrated the database from SQLite to Supabase PostgreSQL, designing a 9-table schema.
- Implemented role-based access control (lead, dev, intern) with automatic assignment by email domain, enforced at the database level.
- Improved repository organization, including project structure, developer documentation, while leveraging AI tools for architecture planning.

### Accenture PH

Feb 2026 - May 2026

*SAP BTP Intern*

- Completed intensive training in SAP BTP, focusing on learning development, integration, and cloud-based solutions.
- Applied SAP S/4 HANA concepts, including Procure-to-Pay (P2P) and Materials Management (MM) processes.

### Medimarc Trading

Jan 2024 - May 2025

*Full-Stack Developer*

- Developed a full-stack inventory system featuring item tracking, sales invoicing, and automated sales and report.
- Designed and implemented a static company website to enhance online presence and client credibility.
- Applied SEO best practices to improve search visibility and overall website reach.

## PROJECTS

---

### Enhanced Solid Waste Management with Computer Vision (Thesis)

*Lead Programmer / ML*

- Led model development by training a TACO dataset and performing extensive data augmentation to improve detection accuracy.
- Fine-tuned YOLOv5 with a ResNet-50 backbone, optimizing hyperparameters to achieve higher precision and robust performance.

### Vault - Finance App Tracker (Personal Project)

- Built a PWA personal finance tracker (Next.js 16, Supabase, Vercel) handling accounts, budgets, recurring bills, transactions, and saving goals.
- Implemented custom UI system with Tailwind CSS + Framer Motion — 15+ bottom-sheet dialogs, animated charts, dark/light theme, keyboard-navigable forms with focus trapping and ARIA labels
- Developed with an AI pair-programming assistant throughout the project lifecycle (OpenCode)

### Web Development & Course Requirement Projects (UST)

- Developed web applications using Java, HTML, CSS and Python as part of course requirements.
- Applied front-end and back-end fundamentals to build responsive interfaces and functional web features.
- Leveraged Python (NumPy, Pandas, Scikit-learn) to build and evaluate machine learning models.

## EDUCATION

---

### University of Santo Tomas

Aug 2022 - Jun 2026

*Bachelor of Science in Computer Science specializing in Data Science*

## CERTIFICATIONS & SKILLS

---

**Tech Skills:** React; Django; TypeScript; JavaScript; Java; Jupyter; SQLite; Postgre; Supabase; Next.js; Tailwind CSS; shadcn/ui; Python; PyTorch; Git; OpenCode;

**Certifications:** Responsive Web Design (freeCodeCamp); Databases and SQL for Data Science with Python (IBM); SAP Certified - Implementation Consultant - End-to-End Business Processes for SAP Business Suite (SAP).
